Essential Medical Biology. Vol. III. Human Parasitology / ed. by N.V. Chebyshev. — Moscow : Medical Informational Agency, 2020. — 264 p.

ISBN 978-5-9986-0385-3

The textbook “Human Parasitology” is a considerable summing up of all current information concerning medical parasitology.

It contains scientific facts about parasitism as a phenomenon, parasitic protozoa, helminths and arthropods — precursors of the most common human diseases.

The textbook provides information about morphology, physiology, biology, development and ecology of parasites, their relationship with hosts. It also gives consideration to various ways of transmission and distribution of parasitic diseases, as well as modern methods of laboratory diagnostics and infections’ prevention.

All sections of the manual have a plenty of illustrations: diagrams, tables, drawings and photographs of the parasites under study. At the end of each chapter you can find control questions for self-testing.

The publication is intended for foreign medical students, and teachers of biological profile. It may also be useful for attending physicians, postgraduates and doctors, interested in current issues and problems of parasitic diseases and modern methods of fighting them.

Content

Chapter 1. Issues of General Parasitology	6
1.1. Parasitism as a phenomenon	6
1.1.1. Parasitism' forms	7
1.1.2. Parasites' penetration into hosts' organisms	9
1.1.3. Adaptations of parasites	11
1.1.4. Parasitic life cycles.....	15
1.1.5. Specific host responses to the parasites' influence.....	18
1.1.6. The parasite's negative influence on the host organism	22
1.1.7. Parasites' protection against hosts' reactions	26
1.2. Natural nidality and the role of arthropods in natural nidus of transmissible diseases.....	30
Summary	36
Questions and tasks.....	37
Chapter 2. Medical Protozoology	39
2.1. Cellular structure and activity of <i>Protozoa</i>	39
2.2. Phylum <i>Sarcomastigophora</i>	42
2.2.1. Class <i>Sarcodina</i>	42
2.2.1.1. Order <i>Amoebida</i>	43
2.2.1.1.1. <i>Dysentery amoeba</i>	43
2.2.1.1.2. <i>Acanthamoeba, naegleria</i>	48
2.2.2. Class <i>Flagellates (Mastigophora)</i>	50
2.2.2.1. Flagellates of digestive and genitourinary tracts.....	50
2.2.2.1.1. <i>Intestinal lamblia</i>	50
2.2.2.1.2. <i>Trichomonads</i>	54

2.2.2.2. Parasitic forms of flagellates inhabiting blood and tissues	57
2.2.2.2.1. <i>Trypanosomes</i>	61
2.2.2.2.2. <i>Leishmania</i>	70
2.3. Phylum <i>Apicomplexa</i>	78
2.3.1. Class <i>Sporozoa</i>	78
2.3.1.1. Order <i>Coccidia</i>	79
2.3.1.1.1. <i>Toxoplasma</i>	79
2.3.1.1.2. <i>Malaria plasmodium</i>	87
2.4. Phylum <i>Infusoria (Ciliophora)</i>	97
2.4.1. Class <i>Ciliates (Ciliata)</i>	97
2.4.1.1. Order <i>Holotricha</i>	97
2.4.1.1.1. <i>Balantidium</i>	97
Summary	100
Questions and tasks.....	103
Chapter 3. Medical Helminthology	105
3.1. Phylum <i>Plathelminthes</i> (flatworms)	107
3.1.1. Phylum peculiarities	107
3.1.2. Class <i>Trematoda</i> (flukes).....	108
3.1.3. Class <i>Cestoda</i> (tapeworms).....	130
3.2. Phylum <i>Nemathelminthes</i> (roundworms)	150
3.2.1. Distinguishing traits of the phylum	150
3.2.2.1. Roundworms. Geohelminths	155
3.2.2.1.1. <i>Nematodes, developing with a migration</i>	155
3.2.2.1.2. <i>Geohelminths developing without migration</i>	168
3.2.2.2. Roundworms – biohelminths.....	173
3.2.2.2.1. <i>Biohelminths, transmitted to the definitive host with larvae encapsulated in meat</i>	173
3.2.2.2.2. <i>Biohelminths with transmission</i>	183
Summary	197
Questions and tasks.....	197
Chapter 4. Medical Arachnoentomology	200
4.1. Phylum <i>Arthropoda</i>	201
4.2. Sub-phylum <i>Branchiata</i>	203
4.2.1. Class <i>Crustacea</i>	203
4.2.1.1. Sub-class <i>Entomostraca</i> (“lower” crustaceans).....	204
4.2.1.2. Sub-class <i>Malacostraca</i> (“higher” crustaceans)	205
4.3. Sub-phylum <i>Chelicerata</i>	206
4.3.1. Class <i>Arachnida</i>	206
4.3.1.1. Order <i>Scorpionidae</i> (scorpions)	207
4.3.2.1. Order <i>Araneae</i> (spiders)	208

4.3.1.3. Sub-class <i>Acari</i> (acarina)	210
4.3.1.3.1. Order <i>Acariformes</i>	212
4.3.1.3.2. Order <i>Parasitiformes</i>	215
4.4. Sub-phylum <i>Tracheata</i>	220
4.4.1. Class <i>Insecta</i>	220
4.4.1.1. Sub-class <i>Hemimetabola</i> – insects with incomplete metamorphosis	225
4.4.1.1.1. Order <i>Blattoidea</i>	225
4.4.1.1.2. Order <i>Heteroptera</i>	226
4.4.1.1.3. Order <i>Anoplura</i> (<i>lice</i>).....	228
4.4.1.2. Sub-class <i>Holometabola</i> . Insects with complete metamorphosis....	233
4.4.1.2.1. Order <i>Siphonaptera</i> . <i>Fleas</i>	233
4.4.1.2.2. Order <i>Diptera</i>	234
Summary	256
Questions and tasks.....	257
