Получена положительная рецензия Экспертной комиссии по работе с учебными изданиями ФГАОУ ВО Первый МГМУ имени И.М. Сеченова Минздрава России (Сеченовский Университет) № 1391 ЭКУ от 20 мая 2021 г.

Paukov, V.S.

Atlas of Pathological Anatomy / V.S. Paukov, V.V. Serov, N.E. Yarygin. — Moscow : Medical Informational Agency, 2022. — 384 p.

ISBN 978-5-9986-0473-7

Knowledge of the pathological process morphology develop the clinical thinking of a medical professional which is one of the main tasks of higher medical education. The “Atlas of Pathological Anatomy” contributes to the solution of this important task.

In the “Atlas of Pathological Anatomy”, the microscopic and macroscopic changes following pathological processes and diseases are illustrated with color drawings and cell and tissue ultrastructural changes are illustrated with electron microscope images. This enables pathological process demonstration on ultrastructural, microscopic and organ levels. This principle of material presentation is of certain interest to students since the pictures focus the attention on the main changes in cells. And although these changes presented schematically, in combination with ultrastructural disorders and organ pathology in specific diseases illustration, the pictures enable better understanding of the disease morphological basis and the functional and structural changes.

Contents

Preface	7
General pathological anatomy	9
A damage.....	9
Dystrophies.....	9
Parenchymal dystrophies.....	10
Parenchymal protein dystrophies	10
Parenchymal fatty dystrophy.....	17
Parenchymal carbohydrate dystrophies	23
Stromal vascular (mesenchymal) dystrophies	25
Stromal vascular protein dystrophies	29
Stromal vascular fatty dystrophy.....	37
Mixed dystrophies.....	39
Chromoprotein dysmetabolism (endogenous pigmentation).....	40
Nucleoprotein dysmetabolism.....	45
Mineral dysmetabolism (mineral dystrophies)	50
Necrosis	54
Apoptosis	62
Blood and lymph circulatory disorders.....	65
Circulatory disorders.....	65
Plethora	65
Anemia, infarction	72
Stasis.....	79
Thrombosis	79
Embolism	85
Bleeding.....	86
Plasmorrhagia	87
Lymph circulation disorders.....	88
Lymph congestion and lymphatic vasodilation.....	88

Inflammation.....	92
Morphological forms of acute inflammation.....	93
Exudative inflammation.....	93
Productive (proliferative) inflammation.....	107
Chronic inflammation.....	116
Inflammation in tuberculosis.....	118
Inflammation in syphilis.....	119
Inflammation in leprosy.....	122
Scleroma inflammation.....	122
Immunopathological processes.....	122
Lymphoid tissue changes.....	122
Local allergic reactions.....	126
Amyloidosis.....	136
Compensation and adaptation processes.....	138
Atrophy.....	145
Compensation.....	145
Regeneration.....	157
Organization.....	165
Tumors.....	166
Epithelial tumors without specific localization (organ-specific).....	178
Benign tumors.....	179
Malignant tumors.....	183
Tumors of exo- and endocrine glands, as well as epithelial integuments (organ-specific).....	190
Soft tissue tumors.....	195
Benign tumors.....	197
Malignant tumors.....	205
Tumors of melanin-forming tissue.....	211
Tumors of the nervous system and meninges.....	214
Tumors of the central nervous system.....	214
Tumors of the autonomic nervous system.....	219
Tumors of the peripheral nervous system.....	222
Tumors of the blood system.....	223
Malignant lymphomas.....	224
Teratomas.....	233
Particular pathological anatomy.....	234
Blood system diseases.....	234
Anemias.....	234
Leukemia.....	237
Diseases of the cardiovascular system.....	245
Atherosclerosis.....	245
Arterial hypertension.....	250

Coronary artery disease	254
Acute coronary heart disease, or myocardial infarction	255
Chronic ischemic heart disease	255
Rheumatic diseases	257
Rheumatic fever	265
Systemic lupus erythematosus	269
Respiratory diseases.....	270
Acute inflammatory lung disease	271
Croupous pneumonia.....	271
Bronchopneumonia.....	278
Chronic diffuse lung disease	279
Pneumoconioses	282
Lung cancer	284
Diseases of the digestive organs.....	287
Gastritis	287
Peptic ulcer.....	291
Appendicitis.....	292
Stomach cancer	294
Colon cancer.....	296
Hepatosi s	301
Hepatitis	302
Liver cirrhosis.....	306
Kidney diseases.....	313
Glomerulonephritis.....	313
Idiopathic nephrotic syndrome (lipoid nephrosis).....	314
Necrotizing nephrosis	319
Dishormonal diseases of female genital organs and breast.....	323
Glandular hyperplasia of the uterine mucosa.....	323
Dishormonal hyperplasias (dysplasias) of mammary glands.....	327
Cervical pseudo-erosion	328
Diseases of pregnancy and postnatal period	329
Eclampsia.....	329
Ectopic pregnancy.....	330
Trophoblastic disease.....	331
Molar pregnancy	331
Choriocarcinoma.....	331
Diseases of the internal secretion glands.....	334
Goiter.....	334
Diabetes mellitus.....	335
Infectious diseases	340
Viral diseases.....	343
Influenza (flu)	343
Poliomyelitis.....	345

Contents

Rabies	348
Cytomegaly.....	350
Rickettsioses	351
Diseases caused by bacteria.....	354
Diphtheria	354
Scarlet fever	355
Meningococcal infection.....	356
Typhoid fever	358
Dysentery	361
Cholera	361
Tuberculosis	364
Syphilis	371
Sepsis	371
Diseases caused by protozoa and helminths.....	376
Amebiasis.....	376
Balantidiasis	376
Toxoplasmosis	376
