Получена положительная рецензия Экспертной комиссии по работе с учебными изданиями ФГАОУ ВО Первый МГМУ имени И.М. Сеченова Министерства здравоохранения Российской Федерации (Сеченовский Университет) № 1896 ЭКУ от 15 сентября 2022 г.

Parfenov, V.A.

Diseases of nervous system / V.A. Parfenov. — Moscow : Medical Informational Agency, 2023. — 432 p. : ill.

ISBN 978-5-9986-0514-7

The main methods of neurological examination, symptoms, syndromes and topical diagnosis of lesions of the nervous system are described in the textbook. The etiology, pathogenesis, clinical picture, diagnosis, differential diagnosis, conservative and surgical treatment of the main diseases of the nervous system are outlined. The textbook is aimed at the formation of clinical thinking, the ability to diagnose major neurological diseases, prescribe effective treatment and conduct timely prevention. Clinical problems and tasks in a test form will allow students and young doctors to check the assimilation of educational material, prepare for tests and exams.

For students of medical universities, clinical residents and neurologists.

CONTENTS

Chapter 1

Somatic sensation disorders	11
1.1. Morphophysiological basis of somatic sensation.....	11
1.1.1. Tactile and proprioceptive sensation	11
1.1.2. Pain and temperature sensation	12
1.2. Patient evaluation.....	16
1.3. Clinical manifestations of sensory disorders at different levels of damage	18

Chapter 2

Movement disorders	25
2.1. Central and peripheral paresis.....	25
2.1.1. Morphophysiological characteristics of the corticomuscular pathway.....	25
2.1.2. Patient evaluation	28
2.1.3. Clinical manifestations of the upper and lower motor neuron lesions, topical diagnosis.....	34
2.2. Extrapyrarnidal motor system, extrapyramidal disorders.....	37
2.2.1. Morphophysiological basis of extrapyramidal system	37
2.2.2. Patient evaluation.....	38
2.2.3. Clinical manifestations of extrapyramidal movement disorders.....	39
2.3. Coordination of movements and its disorder	42
2.3.1. Morphophysiological basis for coordination of movements.....	42
2.3.2. Patient evaluation.....	42
2.3.3. Clinical manifestations of coordination disorders, types of ataxias, topical diagnosis.....	42

Chapter 3

Syndromes of damage to the spinal cord, its roots, peripheral nerves, and nerve plexuses..... 48

- 3.1. Morphophysiological basis of the functions of the spinal cord, spinal and peripheral nerves, plexuses..... 48
- 3.2. Clinical manifestations of damage to the spinal cord, its roots and spinal nerves, topical diagnosis 49
- 3.3. Peripheral nerve damage 51

Chapter 4

Change in sense of smell. Damage to the olfactory nerve..... 52

- 4.1. Morphophysiological basis of the function of smell..... 52
- 4.2. Patient evaluation..... 52
- 4.3. Clinical manifestations of olfactory disorder, topical diagnosis 53

Chapter 5

Visual impairment. Optic nerve damage 55

- 5.1. Morphophysiological basis of the function of vision 55
- 5.2. Patient evaluation..... 57
- 5.3. The main neurological causes of visual impairment, topical diagnosis 61

Chapter 6

Disorders of the oculomotor functions, damage to the oculomotor nerves 63

- 6.1. Morphophysiological basis of oculomotor functions..... 63
- 6.2. Methods for evaluating oculomotor functions and pupil reactions..... 66
- 6.3. Clinical manifestations and causes of oculomotor dysfunction, topical diagnosis 66
- 6.4. Causes of oculomotor and pupil disorders..... 68

Chapter 7

Sensation changes in the face and head. Damage to trigeminal nerve..... 69

- 7.1. Morphophysiological basis of sensation in the face and head 69
- 7.2. Assessment of trigeminal function 71
- 7.3. Clinical manifestations of sensory impairment in the face and head and chewing muscles, topical diagnosis 71

Chapter 8**Damage to facial muscles and taste. Facial nerve damage** 73

8.1. Morphophysiological basis of the functions of the facial nerve 73

8.2. Patient evaluation..... 75

8.3. Clinical manifestations and causes of facial nerve damage, topical diagnosis..... 75

Chapter 9**Vestibulo-cochlear nerve, vestibular disorders, impaired hearing** 77

9.1. Morphophysiological basis of hearing and the vestibular system 77

9.2. Patient evaluation..... 78

9.3. Clinical manifestations..... 78

9.4. Causes of vertigo and sensorineural hearing loss..... 79

9.4.1. Benign paroxysmal positional vertigo..... 79

9.4.2. Meniere's disease 79

9.4.3. Vestibular neuritis 80

9.4.4. Vestibular migraine..... 80

9.4.5. Central vertigo..... 80

Chapter 10**Swallowing and phonation disorders.****Glossopharyngeal and vagus nerves lesions** 82

10.1. Morphophysiological basis of the functions of the glossopharyngeal and vagus nerves..... 82

10.2. Patient evaluation 83

10.3. Clinical manifestations of lesion of the glossopharyngeal and vagus nerves..... 84

10.4. The main causes of the glossopharyngeal and vagus nerves lesions..... 84

10.5. Bulbar and pseudobulbar palsy 86

Chapter 11**Paresis of the sternocleidomastoid and trapezius muscles.****Accessory nerve lesion** 87

11.1. Morphophysiological basis and evaluation of the functions of the accessory nerve..... 87

11.2. Clinical manifestations and causes of damage to the accessory nerve 87

Chapter 12**Paresis of the tongue. Hypoglossal nerve lesion** 88

12.1. Morphophysiological basis and the study of the functions of the hypoglossal nerve 88

12.2. Clinical manifestations and causes of damage to the hypoglossal nerve 88

Chapter 13**Disorders of consciousness** 90

- 13.1. Morphophysiological basis of consciousness 90
- 13.2. Forms of impaired consciousness, patient evaluation 90
- 13.3. Destructive and metabolic coma 93
- 13.4. Chronic vegetative state, minimally conscious state, brain death 94

Chapter 14**Disorders of higher mental functions.****Emotional and behavioral disorders** 95

- 14.1. Morphophysiological basis of the higher brain functions 95
- 14.2. Clinical manifestations of disorders of the higher brain functions 97
 - 14.2.1. Amnesia (memory impairment)..... 97
 - 14.2.2. Agnosia 98
 - 14.2.3. Apraxia 100
 - 14.2.4. Aphasia 100
 - 14.2.5. Executive functions impairment 102
 - 14.2.6. Cognitive impairment, dementia, delirium..... 104
- 14.3. Emotional and behavioral disorders 105
- 14.4. Patient evaluation 107

Chapter 15**Meningeal and hypertensive syndromes, hydrocephalus**..... 110

- 15.1. Morphophysiological characteristics of the meninges and ventricles
of the brain, cerebrospinal fluid circulation..... 110
- 15.2. Patient evaluation 112
- 15.3. Meningeal syndrome..... 113
- 15.4. Intracranial hypertension..... 113
- 15.5. Hydrocephalus 115

Chapter 16**Autonomic disorders** 118

- 16.1. Morphophysiological characteristics of the autonomic nervous system..... 118
- 16.2. Patient evaluation and clinical manifestations of autonomic disorders 120

Chapter 17**Neurogenic bladder dysfunction, neurogenic bowel dysfunction**..... 124

- 17.1. Neurogenic bladder dysfunction..... 124
- 17.2. Neurogenic bowel dysfunction..... 128

Chapter 18

Laboratory and instrumental examinations	129
18.1. Needle electromyography	129
18.2. Electroneuromyography	131
18.3. Transcranial magnetic brain stimulation	133
18.4. Electroencephalography (EEG)	134
18.5. Evoked brain potentials	137
18.6. X-ray of the skull and spine	138
18.7. Angiography	139
18.8. Neuroimaging methods	140
18.8.1. X-ray computed angiography (CT angiography)	140
18.8.2. X-ray computed tomography (CT) of the brain and spine	140
18.8.3. Magnetic resonance imaging (MRI) of the brain and spine	141
18.8.4. Positron emission tomography (PET), single photon emission tomography (SPECT)	145
18.9. Ultrasound diagnostic methods	146
18.10. Cerebrospinal fluid testing	148
18.11. Morphological studies. Biopsy of skeletal muscle, nerves and skin	150

Chapter 19

Cerebrovascular diseases	152
19.1. Acute ischemic cerebrovascular accidents – cerebral infarction and TIA	153
19.1.1. Ischemic stroke	158
19.1.2. Transient ischemic attack	166
19.1.3. Secondary prevention of ischemic stroke	166
19.2. Non-traumatic intracerebral hemorrhage	169
19.3. Non-traumatic subarachnoid hemorrhage	172
19.4. Vascular dementia	175

Chapter 20

Peripheral nervous system disorders	177
20.1. Mononeuropathies	177
20.1.1. Facial nerve neuropathy (Bell's palsy)	178
20.1.2. Peripheral mononeuropathies. Compression (tunnel) neuropathy	179
20.2. Polyneuropathies	185
20.2.1. Acute inflammatory demyelinating polyneuropathy (Guillain–Barré syndrome)	186
20.2.2. Chronic inflammatory demyelinating polyradiculoneuropathy	187
20.2.3. Hereditary polyneuropathies	187
20.3. Plexopathies	188

Chapter 21**Neuromuscular diseases. Motor neuron diseases** 190

- 21.1. Myasthenia gravis..... 190
- 21.2. Progressive muscular dystrophies 192
- 21.3. Myotonia..... 193
- 21.4. Polymyositis, dermatomyositis 194
- 21.5. Spinal amyotrophies 195
- 21.6. Amyotrophic lateral sclerosis 196

Chapter 22**Multiple sclerosis. Acute disseminated encephalomyelitis** 198

- 22.1. Multiple sclerosis..... 198
- 22.2. Acute disseminated encephalomyelitis 201

Chapter 23**Infectious diseases of the nervous system** 202

- 23.1. Meningitis 202
 - 23.1.1. Bacterial meningitis..... 202
 - 23.1.2. Viral meningitis. Tuberculous meningitis..... 203
- 23.2. Viral encephalitis 204
- 23.3. Poliomyelitis 205
- 23.4. Transverse myelitis..... 206
- 23.5. Lyme disease (borreliosis) 206
- 23.6. Neurosyphilis 207
- 23.7. Neurological disorders caused by human immunodeficiency virus 208
- 23.8. Creutzfeldt–Jakob disease..... 209
- 23.9. Brain abscess..... 210
- 23.10. Subdural empyema and epidural abscess..... 211
- 23.11. Spinal epidural abscess..... 211
- 23.12. Herpes zoster 212
- 23.13. Parasitic lesions of the central nervous system..... 213

Chapter 24**Tumors of the nervous system. Syringomyelia** 214

- 24.1. Brain tumors 214
- 24.2. Spinal cord tumors 216
- 24.3. Treatment of brain and spinal cord tumors..... 217
- 24.4. Syringomyelia..... 218

Chapter 25**Traumatic brain and spinal cord injuries** 220

25.1. Traumatic brain injury 220

25.2. Spinal trauma and spinal cord injury 224

Chapter 26**Epilepsy and syncope** 227

26.1. Epilepsy 227

26.2. Syncope 232

Chapter 27**Back pain** 236

27.1. Causes and pathophysiology of back pain 236

27.2. Patient evaluation 239

27.3. Clinical forms 240

27.3.1. Nonspecific (musculoskeletal) back pain 240

27.3.2. Discogenic radiculopathy 241

27.3.3. Fibromyalgia 241

27.4. Diagnosis 242

27.5. Neck pain 242

27.6. Chest pain 244

27.7. Low back pain 244

27.8. Treatment 245

Chapter 28**Headache** 248

28.1. Migraine 249

28.2. Cluster headache 252

28.3. Paroxysmal hemicrania 254

28.4. Tension headache 254

28.5. Medication-overuse headache 256

Chapter 29**Facial pain** 257

29.1. Trigeminal neuralgia 257

29.2. Postherpetic trigeminal neuralgia 260

29.3. Glossopharyngeal neuralgia 260

29.4. Persistent idiopathic facial pain (atypical facial pain) 261

Chapter 30

Main extrapyramidal disorders	263
30.1. Parkinson's disease	263
30.2. Essential tremor	266
30.3. Muscular dystonia	267
30.4. Huntington's chorea, Sydenham chorea	269
30.5. Hepatolenticular degeneration (Wilson disease)	270

Chapter 31

Degenerative brain diseases leading to dementia development	272
31.1. Alzheimer's disease	272
31.2. Dementia with Lewy bodies	275
31.3. Frontotemporal dementia	275

Chapter 32

Sleep and wakefulness disorders	277
32.1. Physiology of sleep and wakefulness	277
32.2. Patient evaluation	277
32.3. Clinical forms of sleep and wakefulness disorders	278
32.3.1. Insomnia	278
32.3.2. Hypersomnia	280
32.3.3. Sleep disordered breathing	281
32.3.4. Sleep-related movement disorders	284
32.3.5. Parasomnias	284

Clinical problems	286
